SECTION A: Specific Recommendation

We, the undersigned, make the following recommendation (please tick one box only):

1. ☐ that the degree of PhD be awarded without the need for any corrections to the thesis.
2. ☒ that the degree of PhD be awarded once specified minor corrections have been completed to the satisfaction of the Internal Examiner (please return this form as soon as possible after the examination, and sign and return the enclosed minor corrections form ONLY when the specified examiner is satisfied that the amendments are complete).
3. ☐ that the degree of PhD be not now awarded, but that the candidate be allowed to undergo a further oral examination without modification of form or content of the thesis.
4. ☐ that the degree of PhD be not now awarded, but that the candidate be allowed to submit a revised thesis after such modification of form or content as the Examiners may prescribe, WITH / WITHOUT* oral re-examination. (*Please delete as appropriate).
5. ☐ that the degree of PhD be not now awarded, but that the degree of Master of Philosophy be awarded (subject only to the necessary changes to the cover and title page of the thesis).
6. ☐ that the degree of PhD be not now awarded, but that the candidate be allowed to submit a revised thesis for the degree of Master of Philosophy after such modification of form or content as the Examiners may prescribe, WITH / WITHOUT ORAL* re-examination. (*Please delete as appropriate)
7. ☐ that the degree of PhD be not awarded.

PRELIMINARY REPORT OF EXAMINERS

FACULTY OF SCIENCE

Each Examiner is required to complete and bring to the oral examination an independent preliminary report on the thesis. The Preliminary Report will be appended to the Examiners' Joint Report. It would be helpful if the Report could be typewritten. Before completing the Report form, please read the attached *Guidance Notes for Examiners*

The candidate (and supervisor on request) will receive a copy of the final Report (comprising the preliminary and joint Reports), which may be released by Research & Innovation Services only, following formal approval by the Vice-Chancellor acting on behalf of the Senate.

Name of candidate: Mr V Ramos-Sanchez
Registration Number: 040171504
Department: Chemistry
Name of Supervisor: Dr J Weinstein
Title of thesis: Raman And Inelastic Neutron Scattering Experiments In The Sulfur-Iodine Thermochemical Cycle
Names of Examiners: Internal Dr M Meijer
External Dr S F Parker

Name of Coordinator
(where applicable):

Please give below a report on the thesis, using additional sheets as necessary. No specific recommendation concerning the award of the degree should be given at this stage.

The thesis provides a comprehensive introduction to the thermochemical splitting of water into hydrogen and oxygen by the sulphur-iodine cycle. There is a detailed description of the experimental methods together with the underlying theory of the spectroscopic techniques employed. There is a considerable body of very demanding experimental work over a range of conditions with different Raman techniques together with an investigation by inelastic neutron scattering spectroscopy of the same system. The experimental work is backed up by quantum chemistry calculations. Overall, the thesis presents a coherent description of a considerable amount of work. It is noted that several papers resulting from the work are either submitted or published and there are clearly more to follow.
